

Y. Eugene Chen, MD, PhD

Frederick Huetwell Professor of Cardiovascular Medicine
Professor of Cardiac Surgery, Physiology, Pharmacology and Medicinal
Chemistry

Associate Chair for Research, Department of Cardiac Surgery
Director, Center for Advanced Models for Translational Sciences and
Therapeutics

Associate Director, UMHS-PKUHSC Joint Institute
University of Michigan Medical Center

Host: Dr. Yuxiang Sun

"Nitro-fatty Acids: from Bed to Bench back to Bed"

Dr. Chen is an expert in diabetes and cardiovascular disease. He cloned Exendin 4 (BYETTA), facilitating GLP1 drug development. He discovered the mechanisms of nitro-fatty acids, novel anti-inflammatory signaling molecules, currently in phase 2 clinical trials. Recently he embarked in successful integration of human genetic discoveries with translational research.

Graduate students are invited to a luncheon with the speaker immediately following the seminar.

September 13, 2019
11:30 AM - 12:30 PM
Cater-Mattil 124
